PROFILE

Making 3D and virtual reality usable for people who never asked for either. 18 years in tech, focused on frontend and design. Started as a full-stack developer at Grupo Planeta, and in 2015 cofounded Floorfy, where I went from UX / UI to leading the frontend: the interface, the design system and the 3D tour viewer.

EXPERIENCE

Floorfy — Lead Frontend Engineer, Barcelona — 2015 - Present

A 3D virtual tour platform for estate agents.

Started out doing design, UX and marketing, because there was nobody else. Now on frontend full time: the interface, the design system, and the tour viewer — used by more than 20,000 agents across over a million virtual properties.

Grupo Planeta — Full Stack Developer, Barcelona — 2013 - 2017

Spain's largest publishing group.

In the anti-piracy department, itself part of Legal. Built the tool for finding pirated copies of the group's books and getting them taken down — the frontend side of it.

BEEP — IT Manager, Barcelona — 2010 - 2011

A computer repair franchise.

Ran the technical team and the systems behind it, and trained the people who kept them running.

Forcet — Computer technician, Barcelona — 2008 - 2010

A barebones-PC startup, big in its day.

Built, configured and repaired machines. Where the eighteen years start.

SIDE PROJECTS

joedoe.dev, as Joe Doe: Voxel Arena · Retro · Soundscapes · Glitch Workshop · Pixel Workshop · Treesify.

SKILLS

HTML & CSS · JavaScript & TypeScript · Vue & Nuxt · Astro · Three.js · Vite · Playwright & Vitest · Figma · Storybook

RECOMMENDATIONS

> "Our experience together is extensive; we have shared vast knowledge and worked directly and indirectly on various projects related to information technologies. Jose has always shown the attitude and aptitude to face challenges and new projects, as well as a great response in resolving incidents. Aside from the fact that we share a great friendship, Jose Vera is a qualified person with vast experience and prepared to face, lead, or supervise any type of project."
>
> **Gabriel Herrera**, Head of IT Infrastructure

> "I have had the pleasure of working with Jose for over a year and in different stages of our product. He has had the ability to adapt to the needs and adjust the pace of work as the company progressed. Jose has the ability to put a face to ideas. He is what I call a design technician, taking care of all visual details, always obsessed with perfection on all types of screens/devices."
>
> **Sergi Jiménez Barbé**, CEO & Founder of Floorfy

> "Jose has shown a tremendous interest in learning the knowledge and techniques of the world of Web Application Development. He has also produced excellent work that reflects his deep understanding of the subject, developing advanced and sophisticated technical solutions to the problems at hand."
>
> **Alfredo Rueda Unsain**, AI Software Engineering Consultant · formerly Professor at TecnoCampus
